Attachment #1

3. Project Description

This project consists of the collection and storage of water in the existing on-stream reservoir at Point of Diversion #1 (see location on Attachment 5), having a capacity of 45.8 acre-feet (see topographic survey and area-capacity curves – Attachments 3 and 4) located on the Applicant's property. Water is used for non-consumptive recreational purposes. The Applicant believes that the reservoir was built by the Soil Conservation Service in the early 1950s. It stores sheetflow and water collected from its naturally tributary drainage area. The reservoir has not changed from the time that it was constructed, and no further development is requested or anticipated.

As stated above, the project proposed under this Application involves no changes to the existing reservoir at Point of Diversion #1 and no changes in water use relative to historical conditions for this project. Accordingly, this Application qualifies for a Categorical Exemption under Title 14, California Code of Regulations, Section 15301, Existing Facilities, which states the following:

"Class 1 consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination."

Based on the foregoing, we are requesting that the State Water Board grant a Categorical Exemption to this Application and proceed with further processing as necessary for permit issuance.

Attachment #5

15. Map
See separate attachment.

Attachment #6

18. Environmental Document
The applicant believes the project will be found to be exempt from CEQA. The Applicant understands that a survey to identify any impacts to public trust resources may be required.
